

Breakdown by industry of enterprises in the nuclear evacuation zone

Industries such as construction, the wholesale and retail trades, and agriculture, forestry, and fisheries tend to be more common in the nuclear evacuation zones. There also tend to be proportionately more people employed in agriculture, forestry, and fisheries, construction, electricity, gas, heat supply, and water.

(1) Breakdown of enterprises by industry

Source: MIC, 2009 Economic Census: Basic Survey.

Note: Industries are classified according to the *Japan Standard Industry Classification* (revised November 2007). "Others" represents the total for the following major categories of industry: mining and quarrying of stone and gravel; electricity, gas, heat supply, and water; information and communications; transport and postal services; finance and insurance; real estate and goods rental and leasing; scientific research, professional and technical services; education and learning support; medical, health care and welfare; compound services; and services (not elsewhere classified).

Note: The original data of this figure is provided by the Ministry of Internal Affairs and Communications, "2009 Economic Census; Basic Survey."

Source: The revised title is based on the Cabinet Office, "2011 White Paper on Small and Medium Enterprises in Japan."
