

State of damage to Seafood processing facilities in the prefectures of Aomori, Iwate, Miyagi, and Fukushima

	Number of seafood processing plants	Principal damage			
		Completely destroyed	Partially destroyed	Flooded	Details
Aomori	119	4	14	39	Damage in Hachinohe district
Iwate	178	59	6	—	Bulk of facilities swept away, damaged, or destroyed
Miyagi	439	323	17	38	Devastating damage to majority of facilities
Fukushima	135	—	—	—	Details not known

- Note: 1. Damage is as of 17:00 on May 31, 2011. The number of seafood processing plants is according to MAFF, “2008 Census of Fisheries.” Publicly available data on seafood processing plants in Aomori Prefecture concern only those located on the Pacific coast.
2. Figures on fishing ports and fishing vessels are based on reports from the prefectures concerned.
3. Only facilities on which reports have been received at present are included. The damage is therefore expected to turn out to be considerably higher.
4. The tsunami also caused tremendous damage to other facilities, including oil depots, fresh seafood storage facilities, and fishery storage facilities. Details of damage to these facilities are presently under investigation.

Note: The original data of this figure is provided by the Ministry of Agriculture, Forestry and Fisheries (MAFF) “The Damages caused by the Great East Japan Earthquake and Actions by Ministry of Agriculture, Forestry and Fisheries (Attachment 1 :Fisheries)”

Source: The revised title is based on the Cabinet Office, “White Paper on Small and Medium Enterprises in Japan”.
